ECONOCOM GROUP SHARE JOINS THE BEL MID INDEX

Effective immediately, the Econocom Group share, listed on NYSE Euronext, has joined the BEL Mid index.

Of all the Midcaps on the Euronext NYSE in Brussels, BEL Mid has the highest free-float market capitalisation and liquidity.

Since 2011, thanks to the Group's new size resulting from the successful acquisition of ECS and strong financial performances, the Econocom Group share has risen by +53%. Econocom's market capitalisation now stands at €400 million. Meanwhile, the stock's liquidity has increased sharply, with average daily trading volumes rising from 12,000 shares in 2010 to over 20,000 since the beginning of the year.

Joining the BEL Mid index will ensure enhanced visibility and higher liquidity for the Econocom Group share.
